Nathan Kirkman Advertising – Continue reading Below 1 Check out this super stylish, industrial-style kitchen worth nothing less than a sweet, statement tile. We are obsessed with this takeover of a chessboard, with slightly unaligned plates to prevent it from feeling too polished. 2 The simplest cleanup ever colored concrete tiles give this kitchen the natural texture coast. They are also insanely durable, so you don't have to worry about children or pets wreaking havoc on them. 3 Two Floors > One Can't decide between wood and tile? This kitchen is proof that you don't have to. Wooden planks run in a hexagonal mosaic tile. It's eclectic, unexpected and somehow, very sexy. 4 Diamond (Floors) I am the best friend of a Turkish tile girl terrazzo create a graphic floor that perfectly accents white subway tile. 5 Matchy-Matchy Match tiles to your countertops, and you won't have to stress about anything in conflict. Heat the space (and add contrast) with a bold, colorful carpet. See more of A House In The Hills. 6 Fake It 'Til You Make It Live out your dreams hardwood floor with wood-tones tiles. Put them in a similar pattern to hardwood, and you'll have the look you've dreamed of for a lot less money – plus, cleaning the tile is a breeze. 7 Turn Up For terracotta If you want a kitchen that feels laid-back and lived in, opt for terracotta tiles. The farm-style kitchen of this house receives a dose of hacienda charm from the hexagonal patterned floor. 8 Wood on wood There is a lot of wood going on in this kitchen, so to complete the cabinets and the island, the floors got concrete tiles in a similar shade. A subtle pattern helps keep it from feeling too monochromatic. 9 Bring the party to the floor white kitchens can get basic, fast. De-blandify your kitch without having to swap out cabinets or re-do backsplash by creating a patterned colorful tiled floor. 10 Keep It Classic white tile might sound boring and basic, but there is a time and place for it, and that time and place is in a bold kitchen like this. Between painted and patterned shutters, backsplash colored, the floor could use a little white tile base. All rights reserved terracotta is a form of ceramic tiles made of a relatively soft red clay fired at moderate temperatures (about 1800 degrees Unlike most ceramics, terracotta tiles do not receive a glazed surface treatment. This means that they cannot be printed and are not protected against stains and water damage. Terracotta can be sealed to protect the material against these dangers, but in general, terracotta tiles will be less durable, more to damage, and harder to maintain than other types of ceramic tiles. Despite the disadvantages, the terracotta appeal is the rich beauty and natural sense of the material. The colors that are made in these plates have a unique appeal, which is complemented by the slightly classified texture of their untreated surfaces. For this reason, terracotta flooring is still in high demand, especially in homes fighting for an authentic Southwest feel. In this example, decorative accent tiles with a Spanish/Moorish flavor are inset at different locations to give the floor more interest. Continue with 3 out of 7 below.
